# Full-Stack Developer

Remote (India)

Contract

Software Development

**Location:** Remote | **Type:** Full-time | **Compensation:** Competitive salary + stock options

## About VELZI AI

At **VELZI AI**, we're redefining finance for the modern business. Our mission is to **eliminate manual accounting** through cutting-edge AI automation. From procurement to financial reporting, our intelligent SaaS platform streamlines every step—so companies can focus on growth, not spreadsheets.

We're a fast-growing, AI-driven fintech startup backed by innovation and a clear vision. Now, we're looking for a **Full-Stack Developer** to help bring this vision to life.

## About the Role

As a Full-Stack Developer at Velzi AI, you'll work across the stack to create powerful, scalable web applications that delight users and simplify complex financial workflows. You'll collaborate closely with our engineering, product, and design teams to push the boundaries of what's possible with fintech and AI.

## Tasks

### What You'll Do

#### Frontend Development

- Build fast, responsive UIs with **React**, **Next.js**, **JavaScript**, **HTML**, and **CSS**
- Convert **Figma** designs into clean, accessible, pixel-perfect components
- Optimize for speed, security, and performance

## 🔗 Backend & Middleware

- Develop server-side logic with **Node.js** and **Python**
- Build and scale **RESTful APIs**, handle secure integrations, and manage system performance
- Work with both **Firebase Authentication** and **MongoDB**, optimizing data flow and structure
- Understand and apply concepts from both **RDBMS** and **NoSQL** systems

## 🔗 API & System Integration

- Design and consume both private and public APIs
- Troubleshoot integration issues and ensure secure, efficient communication between services
- Bonus: Experience with third-party OAuth (Google, Microsoft, etc.)

## 🔗 UI/UX Implementation

- Transform UI/UX designs into intuitive, high-performing interfaces
- Ensure accessibility and responsive design across devices

## 🔗 Collaboration & Code Quality

- Work within an **Agile** team environment using **SOLID** principles and best practices
- Conduct code reviews, share learnings, and mentor junior developers
- Collaborate cross-functionally with product, design, and other engineering team members

## Requirements

### ✓ What We're Looking For

- **Relevant work experience** and completed technical education
- Strong foundation in **JavaScript**, **Node.js**, and **Python**
- Experience building **cloud functions**, managing authentication, and optimizing performance
- Proven ability to build responsive UIs and translate **Figma** into front-end code
- Solid understanding of **API architecture** and integration
- Comfort working with **Firebase**, **MongoDB**, and cloud-native tools
- Bonus: Experience with **AI models**, **LLMs**, **prompt engineering**, **RAG**, and **vector databases**

- You're a **versatile professional**—comfortable working across different stacks and tools
- You're a **problem-solver** who thrives in ambiguity and loves building from 0 to 1
- You're a **self-starter** who enjoys ownership but also thrives in a collaborative, feedback-driven team

## Benefits

### 🎁 Why Join VELZI AI?

- 🌐 **Remote-first & flexible** – Work from wherever you do your best work
- 🛠️ **Cutting-edge tech** – Work with AI, automation, and the latest dev tools
- 🚀 **Rapid growth** – Be part of an early-stage rocket ship
- 🤝 **Collaborative culture** – Join a team that values innovation, autonomy, and teamwork
- 💰 **Competitive salary & equity** – Get well-compensated with generous stock options
- 📈 **Career advancement** – As we scale, so do your opportunities

### ✉️ How to Apply

Ready to build the future of finance?

**Click “Apply”** and let's start building AI-powered financial automation together.

**Join VELZI AI. Automate boldly. Build brilliantly. 💡⚡**
